Deep in the heart of the multiverse, a tear appeared in the fabric of reality. The Moonboy Society, a tribe of brilliant primates, set out on a daring mission to uncover the mystery behind the anomaly. Among their ranks were the elite Dimensional Nomads, master navigators of the multiverse who could traverse the vast expanses of space and time with ease.

As they journeyed deeper into the unknown, the Nomads discovered that the multiverse was not a static entity, but a living, breathing tapestry of infinite possibility. Each universe held its own unique properties and characteristics, and the Nomads realized that by mastering the laws of each universe, they could move between them at will.

But as they explored the multiverse, the Nomads noticed something strange happening. Every time they moved between universes, one of their traits would change. Some Nomads knew they had to find a way to protect their unique abilities and characteristics, while others heard whispers of a cosmic event that could unlock the gateway to new universes.

Rumors spread that if 69% of all Dimensional Nomad NFTs were gathered in one universe, a massive explosion of multiversal energy would be unleashed, leading to an unknown result beyond imagination. The Nomads soon realized that they must band together to prevent the delicate balance of the multiverse from being disrupted, though many have differing opinions on what that means.

Armed with their Universe Keys, the Nomads set out on a quest to explore the vastness of the multiverse, fighting to preserve the balance between the universes and safeguard their traits. But with each move, there is a cost. Every time a Nomad is transferred to a new universe, one of its unique traits changes, leading some Dimensional Nomads to use additional Universe Keys to protect themselves during the transfer.

Universe Keys represent the key to the multiverse, a powerful tool that allows the elite Moonboys, the Dimensional Nomads, to embark on epic adventures, explore the infinite potential of the multiverse, and unlock its secrets.

As the Moonboy Society's MBSociety, Galaxy Commanders, and Dimensional Nomads stake their claim in the multiverse, their legend grows, and the Moonboy Society knows that their journey has just begun. Welcome to the Dimensional Nomads, where the possibilities are endless, and the journey never ends.

Moonboy Origins

In 2022, the Moonboy Society set a goal of uniting the fragmented NFT community and providing value to the Cardano community. We recognized the tribalistic tendencies that pervade the NFT space, and knew that we needed a common purpose to bring us together. That purpose was the moon. As you're likely aware, the term "Moon Boys" is often used as a derogatory term within the crypto community. However, we chose to embrace this term and turn it into something positive with our "Moon Project". We want to create a community where being a Moon Boy or Moon Girl is something to be proud of. We invite you to join us in our quest to explore the cosmos and become a part of our astronaut family.

After we united the Cardano community, we realized that our mission didn't have to stop there. Our next goal was to bring together different blockchains and their communities under one common purpose. We recognized that the tribal nature of the NFT community extended beyond Cardano and that we had a unique opportunity to change that. By creating a project that allowed NFTs to travel between different blockchains, we could create a sense of unity and collaboration across the entire NFT space. This was the birth of Dimensional Nomads, a project that brings together NFT enthusiasts from all corners of the multiverse.

The Big Bang of Ridiculousnessicity

The MBSociety was born of a decade-long friendship created by two young teenagers serving religious "missions" in the Balkans. Complete strangers, our Founders were paired up as companion "SAINTS" to preach and do the work of the almighty! As two 19-year-old kids would realize, they found preaching the word outside their forte. They were on a different mission. Instead, they opted for drawing during all the waking hours, slowly filling up their kitchen ceiling with pencil art, drawn on the back of "Free English Class" flyers. They called their masterpiece "The Ceiling of Ridiculousnessicity".

Sometimes it takes dropping our lives, moving across the world, and serving God to find a best friend and a love for art.

MBS Insurance Policy

The multiverse is vast and full of wonders. And the Moonboy Society is leading the charge into the unknown. For those brave enough to join our mission, we offer more than just a chance to explore the stars. We offer the protection of our MBS Insurance Policy. It's not your typical insurance plan. It's provided by the community itself. When you buy an Astronaut NFT, you're part of a coalition of adventurers who share a common goal: reaching the moon. And with our promise to always purchase

select astronaut NFTs throughout the galaxy, we're unstoppable. We're sweeping the floors of partner projects astronauts, ensuring that our community is covered, no matter what.

The Moonboy's Guide to the Multiverse

Phase 1: MBSociety Genesis Launch

Mission Objective: Unite the Cardano Universe

MISSION ACCOMPLISHED

The MBSociety Genesis Launch marked the beginning of our mission to unite the Cardano community under a common purpose. We established the Moonboy Society as a real "Moon Project" where being called a Moon Boy is a badge of honor. We launched the Genesis collection, which includes the original Moonboy Society NFTs that will continue to serve as a valued part of the overall collection with long-lasting utility. We are committed to ensuring that our early supporters remain integral to our journey as we continue to evolve and innovate.

Phase 2: Multiverse Travel

Mission Objective: Discover the similarities, differences, and wonders of the Multiverse

MISSION COUNTDOWN: OCTOBER 2023

Get ready to strap on your astronaut suits and travel between not just galaxies, but entire universes! The tear in the fabric has been exposed, but the multiverse demands balance. The whispers of a cosmic threshold hold mysteries known but to a few in all the multiverse.

Our next phase is all about bringing different blockchain NFT communities together, just like we brought the Cardano community together in phase 1. Through our innovative technology, we'll be able to travel between universes and discover new NFT collections, planets, and moons.

So get ready to launch into a whole new dimension of NFT exploration and adventure - the Multiverse is waiting for us! We are excited to announce that we are developing a groundbreaking feature that will allow collectors to move their NFTs between 4 blockchains in the multiverse. This feature will enable a new level of flexibility and cross-chain functionality that has never been seen before. Our goal is to create a seamless experience for collectors, allowing them to freely explore the different universes of the NFT world and discover new and exciting possibilities.

Phase 3: Engage 2 Earn gamification

Mission Objective: Discover the similarities, differences, and wonders of the Multiverse

MISSION COUNTDOWN: SPRING 2024

Holders of OG MBSociety NFTs and the all-new Dimensional Nomads will get to participate in our web2 engage 2 earn gamification by passively staking their NFTs for varying periods. Get ready to embark on thrilling missions with different trait and quantity requirements that will take you to the furthest corners of the multiverse. But don't worry, we won't send you on this journey alone - you'll team up with other Nomad holders and Moonboy Society members to tackle these missions together. And did we mention the bonuses? MBSociety NFTs and Dimensional Nomads provide explorers with special bonus stats that will give you a leg up on your mission to discover and loot new planets, moons, and rocket ships. So what are you waiting for? Suit up and let's blast off!

The NFT Collections

In the vastness of the multiverse, three unique NFT collections have emerged from the depths of space to unite the most daring and adventurous collectors: the MBSociety, the Dimensional Nomads, and the Galaxy Commanders. Each collection represents a different aspect of the Moonboy Society's mission to explore the infinite potential of the multiverse and bring utility to the Cardano ecosystem.

The MBSociety is our OG collection, a gathering of diamond-handed individuals who share our passion for the stars and the moon. With a special whitelist for the Dimensional Nomads and additional rewards in our staking and engage 2 earn gamification, the MBSociety NFTs represent a pledge to reach for the stars and hold strong in the face of adversity.

The Dimensional Nomads are a rare and elusive group of NFTs that can travel between the four chains of the multiverse, shifting their traits with each move. With the power to unlock new universes and explore the infinite potential of the multiverse, the Dimensional Nomads represent the ultimate adventure for those brave enough to join their ranks.

Finally, the Galaxy Commanders represent the pinnacle of our NFT collections, a group of just 100 lucky individuals who will be rewarded with giveaways of floor sweeps and other exclusive perks. As commanders of the Moonboy Society's mission to explore the multiverse, the Galaxy Commanders are a force to be reckoned with, inspiring awe and envy in all who behold their legendary status.

Phase 1: MBSociety NFT – Our OG Collection

The Art

The founders of the MBSociety are a group of professional crypto degenerates and NFT enthusiasts who were determined to create something that would stand the test of time. They knew that the key to achieving this was through the art. After all, a picture is worth a thousand words, but they asked themselves, "How do we make each of our NFTs worth... ONE MILLION words?"

With each of the 8500 x 8500 pixelated moon suits, they attempted to give you at least a million words. Each trait was hand-drawn using a tablet by a self-taught artist who completed the artwork in under five months. Over 500 hours were spent during these short months of learning and drawing. All pieces are original, and no trademarks or intellectual property were infringed upon during the process.

What's more, every trait is filled with the artist's own renditions of iconic video games and other pop culture references, hidden within the artwork and waiting to be discovered through zooming in. The Moonbody Society's love for gaming and nostalgia is evident in every trait. Some traits are nuggets in and of themselves, while many more Easter eggs can be found within each trait. There's no shortage of hidden "gems" within the art.

In the MBSociety collection, the helmet was intentionally left closed. This was done to spark your imagination, to encourage you to envision putting your own NFT from any collection inside our collection of space suits and helmets. With each NFT, you can create your own unique story within the MBSociety universe.

Easter Eggs

Within the Space Academy Chat of our Discord, you'll discover an array of hidden treasures and secrets tucked away within the artwork. However, we've made a conscious decision not to disclose a complete list of these Easter eggs to the public. This is an opportunity for you to go on a scavenger hunt, exploring the intricate details and discovering the hidden gems within each trait. Will you be able to find them all? Does your favorite childhood game make an appearance within the art? Take your time and engage with the community, for in doing so, you'll be able to collect unique Easter eggs to accompany you on your moon missions.

Traits

Chaos Gem Easter Egg

Moonboy Society strives for uniqueness and disruption. Have you taken a closer look at the gems on the left elbow of our assets? They are not mere embellishments, but rather one of the few easter eggs were going to lead directly to, they are an homage to the Chaos Emeralds from Sonic the Hedgehog. These seven gems not only signify the origin of your suit in the galaxy, but also enhance your chances of farming and looting specific resources. It's worth noting that owning one of each color of these Chaos Gems will bring significant advantages to your journey in the multiverse.

Each Chaos Gem plays a vital role in determining the rarity of your asset and its corresponding percentage class. This unique tiered rarity chart allows you to easily identify rarer assets, giving you an edge in sniping them off the floor. And here's a bonus - these gems are linked to the resources that you'll be searching for in our upcoming web 2 game, Beyond the Moon.

MBSociety Dimensional Nomad Whitelist Plan

We believe that every NFT in the MBSociety collection is a work of art, regardless of rarity. That being said, we also understand that owning an NFT with a rarer gem has its perks. As such, we have created a whitelist strategy that offers every MBSociety NFT holder the chance to participate in the whitelist for our Dimensional Nomads collection.

Moon Boy Blue (25): 4 whitelist spots with choice of chain to mint on

Ranger Blue (128): 3 whitelist spots with choice of chain to mint on

Deku Emerald (148): 2 whitelist spots with choice of chain to mint on

Rocket Fuel (175): 2 whitelist spot with random chain assignment

Star Dust (303): 1 whitelist spot with random chain assignment

Moon Juice (402): 1 whitelist spot with random chain assignment

Plasma Gold (426): 1 whitelist spot with random chain assignment

We believe that all NFTs in the MBSociety collection are unique and valuable in their own right, regardless of rarity. We wanted to create a whitelist strategy that rewards all collectors, while also recognizing the rarity of each asset. We hope that this will help to foster a sense of community and inclusivity among all MBSociety collectors.

The MBSociety OG NFTs **CAN NOT** travel across universes in the Multiverse

MBSociety Simple Staking

The MBSociety OG NFTs will earn simple staking rewards at the highest rate in the Moonboy Society Collection

MBSociety Engage 2 Earn

The MBSociety NFT is not just a stunning work of art or even just a whitelist guarantee, it is also a key to unlocking new opportunities in the upcoming phase 3, engage 2 earn. We have big plans for our NFT holders and their moon missions, but we can't reveal too much just yet. What we can tell you is that it will be a gamification experience like no other. It will be a chance for our community to come together and earn rewards like never before.

Phase 2: Dimensional Nomads NFT – 10,000 Elite Multiverse Traveling Moonboys

The Moonboy Society proudly presents the Dimensional Nomads - 10,000 elite interdimensional travelers, each crafted with individuality and care. As members of an interdimensional tribe, these Nomads boldly explore the vast multiverse and adapt to its ever-changing environment. At the outset, these NFTs will be evenly distributed across the Ethereum, Cardano, Solana, and Polygon blockchains, with 2,500 Nomads on each chain.

The Dimensional Nomad NFTs in the Moonboy Society collection have a unique and exciting feature: as they journey through the multiverse, the Nomads notice that one of their traits changes each time they move between universes. Collectors will have the opportunity to own and trade Nomads with rare and valuable combinations of traits, as well as attempt to gather 69% of all Nomads in one universe to unlock unexpected powers at a cosmic event.

During this cosmic event, collectors who have contributed to the gathering of Nomads will have the opportunity to reap rewards and discover new and exciting features of the Moonboy Society universe. The Dimensional Nomads are a mysterious and intriguing collection, each possessing a distinct set of traits that make them one-of-a-kind. Will you be the one to unlock the secrets of the multiverse with your collection of Nomads?

Community Collaboration

The Dimensional Nomads project emphasizes the importance of community collaboration in maintaining the balance of the Multiverse and unlocking the project's full potential. By fostering a strong sense of community and teamwork, the project aims to create an engaging and supportive environment for all Dimensional Nomad NFT holders.

1. **Collaborative Decision-making:** Empowering the community with decision-making power through the use of Universe Keys for governance will create a sense of ownership among Dimensional Nomad NFT holders. This approach encourages collaboration and ensures that the project remains true to its community-driven ethos.

2. **Cross-Project Collaborations:** Partnering with other NFT projects, artists, and platforms will create opportunities for unique collaborations and co-branded content, expanding the Dimensional Nomads ecosystem and reaching new audiences.

Utility

Travel

Dimensional Nomads are elite interdimensional travelers, each possessing the ability to navigate through the vast multiverse. They can seamlessly travel between different dimensions, universes, and even alternate realities, discovering new worlds and encountering unique challenges along the way. These intrepid explorers are adaptive by nature, using their skills and knowledge to overcome obstacles and forge their own paths. With each journey, they gain new experiences and knowledge, evolving and growing as they explore the mysteries of the multiverse.

Trait Transformation

As Dimensional Nomads travel between universes, their traits may change due to the dynamic nature of the multiverse. This transformation adds an element of excitement and risk to the interdimensional exploration, as owners must decide whether to embrace these changes or use Universe Keys to protect their Nomad's unique traits during travel.

The community-focused aspect of the Dimensional Nomads project encourages Nomad NFT holders to work together, collaborating on strategies to preserve or chase traits and maintain balance within the multiverse.

FIND MORE INFORMATION ABOUT TRAIT TRANSFORMATION AND MULTIVERSE TRAVEL IN THE UNIVERSE KEY SECTION OF THIS DOCUMENT

Patch Airdrops

Mid phase 2, unlisted Dimensional Nomads will receive a patch that can be added to their spacesuits after it is airdropped to all MBSociety holders. This patch allows you to display the image of any astro NFT you own from the MBS insurance policy on the spacesuit of your Dimensional Nomad, adding a personal touch to your exploration of the multiverse. In addition, combining the patch with the Dimensional Nomad spacesuit will provide an additional +1 ATK and +1 DEF to your rocket ship. It's a great way to show off your favorite astro NFTs while also increasing your spaceship's capabilities. Get ready to suit up your Dimensional Nomad and embark on intergalactic adventures with your favorite NFTs by your side.

Trait Rarity

Trait rarity is determined by the frequency of occurrence within the entire collection of Dimensional Nomad NFTs. The rarer the trait, the more valuable and sought-after the Dimensional Nomad becomes. Additionally, some rare traits may provide utility within the multiverse, offering unique abilities, bonuses, or access to exclusive offerings.

Dimensional Nomad NFT Traits

Each Dimensional Nomad NFT has a combination of visually distinctive and rare traits. These traits are divided into several categories, such as:

1. **Physical Traits:** These traits are purely aesthetic and do not affect gameplay or abilities. They are randomly generated for each Nomad NFT and can vary greatly between Nomads. Examples of physical traits include fur color, eye shapes, helmet type
 1. **How Does the Trait Activate:** NFT minting or travel between dimensions.
 2. **Activation Cost:** No additional cost beyond minting or dimensional travel.
2. **Personality Traits:** These traits affect the behavior and interactions of the Dimensional Nomad NFTs in the Dimensional Nomads community and side missions. Each Dimensional Nomad NFT will have a set of randomly generated personality traits that can range from brave and adventurous to timid and cautious. These traits will influence how the Dimensional Nomad interacts with other Nomads in the community, as well as how they approach challenges and side missions.
 1. **How Does the Trait Activate:** NFT minting or travel between dimensions.
 2. **Activation Cost:** No additional cost beyond minting or dimensional travel.
3. **Clan/Universe Traits:** These traits will be unique to specific clans or universes within the Dimensional Nomads multiverse. For example, the Cardano clan may have a trait related to staking Cardano, which could provide bonuses or benefits for holding Cardano while exploring the Cardano universe. The Ethereum universe may have a trait related to NFT trading, which could provide benefits for actively trading NFTs within that universe.
 1. **How Does the Trait Activate:** NFT minting or travel between dimensions.
 2. **Activation Cost:** No additional cost beyond minting or dimensional travel.
4. **Abilities Traits:** These traits will be more complex than simple superpowers, requiring strategic use and development throughout the gameplay experience. For example, a Dimension Nomad with the time travel ability may be able to travel through time, but this ability may be limited by a cooldown period or the number of Universe Keys required to activate it.
 1. **How Does the Trait Activate:** A Nomad chooses to use a trait capability in some form of gameplay (Dimensional travel, Engage 2 Earn, etc).
 2. **Activation Cost:** Varying costs of Universe Keys

Ability Trait Categories

Ability traits can be used in gameplay. Some can be used in the dimensional travel gameplay. Some can be used in Moonboy Society Engage 2 Earn gameplay. Some can be used for problem solving and hints.

A. Trait Mastery

1. Shape Shifter: Can change appearance and form in response to the environment of a particular universe by choosing the trait they would like to change during interdimensional travel.
2. Dimensional Phasing: Can pass through dimensional barriers and return to the same universe it began for no additional Universe Keys with the newly acquired traits.
3. Dimensional Awareness: Has an innate sense of the multiverse, making it easier to navigate and avoid danger in Engage 2 Earn gameplay.
4. Adaptive Biology: Can re-roll their trait change one time each time they traverse dimensions for a new, random trait change. Must be done within 24 hours.
5. Suit Summoner: Can swap between two different spacesuits on command, providing a tactical advantage in specific situations

Travel Efficiency

1. Portal Navigator: Can more efficiently navigate and locate portals within and between universes, increasing odds of returning safely, mission accomplished in the Engage 2 Earn game.
2. Resourceful: Can find and collect resources more easily, both helpful in Engage 2 Earn missions and reducing the cost of interdimensional travel.
3. Planeswalker: Can travel greater distances with each use of a Universe Key, allowing them to make 2 universe hops for the universe key cost of a single hop.
4. Interdimensional Trader: Can trade resources and items between universes, providing a potential source of income or advantage in completing side missions.

Universe Master Traits – Most Rare set of Traits

1. Universe Master (**25 per chain**): Moves between dimensions at zero Universe Key cost but takes a great toll on their energy and must rest for 10 days.
2. Cosmic Explorer (**100 per chain**): Has a higher chance of discovering rare and valuable resources or items while exploring different universes in the Engage 2 Earn game.
3. Cosmic Guardian (**35 per chain**): Can be accompanied by 5 Nomads during interdimensional travel.
4. Finger Snap (**1 per chain**) Can use their Universe Keys to create new universes or manipulate existing ones, potentially leading to the discovery of new multiversal secrets.

Problem Solving

1. Code Breaker: Dimensional Nomad has an innate ability to solve complex codes and ciphers.
2. Riddler: Dimensional Nomad is a skilled solver of riddles and brainteasers.
3. Strategist: Dimensional Nomad has an advanced understanding of game theory and can apply it to strategic decision-making.
4. Mind Reader: Dimensional Nomad has an uncanny ability to read and understand people's thoughts and intentions, making them adept at predicting behavior and solving interpersonal puzzles.

Universe Keys

Universe Keys are the primary gameplay element and utility token within the Moonboy Society ecosystem. They play a crucial role in enabling the Dimensional Nomads to traverse the multiverse and interact with its diverse environments. As a deflationary token, the supply of Universe Keys will decrease over time, making them more valuable and scarcer.

A. Travel and Trait Protection

Universe Keys are required for Dimensional Nomads to travel between universes within the Dimensional Nomads ecosystem. During interdimensional travel, a Dimensional Nomad's traits might change due to the unstable nature of the multiverse. To preserve their Dimensional Nomad's unique traits, owners can use additional Universe Keys, providing an extra layer of protection and maintaining their Dimensional Nomad's rarity and value.

The emphasis on community collaboration plays a vital role in managing the use of Universe Keys, ensuring that the ecosystem remains balanced and sustainable.

B. Staking and Rewards

Owners can stake their MBSociety, Galaxy Commanders, and Dimensional Nomad NFTs to earn Universe Keys as rewards. The staking mechanism will be designed to consider factors such as the rarity of the Moonboys, the duration of the stake, and the current distribution of Dimensional Nomads across universes. By staking their Moonboy Society NFTs, owners can generate a passive income of Universe Keys, which can be used for various purposes within the Dimensional Nomads ecosystem.

Staking also fosters a sense of community as Dimensional Nomad NFT holders work together to optimize their rewards and maintain the delicate balance within the multiverse.

C. In-Game Utility, Governance, and Side Missions

Universe Keys also serve as a governance token, allowing Moonboy Society ecosystem NFT holders to participate in decision-making processes related to the future development and direction of the Moonboy Society project. This community-driven approach ensures that the interests and desires of the Moonboy Society NFT holders are prioritized, and that the ecosystem continues to evolve in a way that benefits all participants.

Universe Keys can also be used to access side missions within the Moonboy Society ecosystem. These missions provide Moonboy Society NFT holders with additional challenges, opportunities, and rewards,

further enhancing the overall experience and sense of community within the project. Side missions could include puzzles, scavenger hunts, or collaborations with other NFT projects.

D. Deflationary Mechanism and Token Burns

As a deflationary token, the supply of Universe Keys will gradually decrease over time by burning tokens each time a Dimensional Nomad hops between universes. This mechanism ensures that the value of Universe Keys remains stable or increases, incentivizing long-term holding and active participation in the Dimensional Nomads ecosystem. By carefully managing the supply of Universe Keys, the project can maintain a balanced and healthy economy, fostering a thriving and interconnected community of Dimensional Nomad NFT holders.

E. Community-Driven Development

The utility and value of Universe Keys will continue to expand as the Moonboy Society project grows and evolves. Community-driven development will play a significant role in shaping the future of Universe Keys, with new use cases and features being introduced based on the needs and desires of the Moonboy Society ecosystem NFT holders.

By actively engaging with the community and encouraging collaboration, the Moonboy Society team aims to create a thriving, interconnected ecosystem that transcends the boundaries of individual blockchains and ushers in a new era of interdimensional exploration and adventure. Emphasizing the importance of community cooperation in maintaining the balance and stability of the multiverse, the Moonboy Society will continually provide opportunities for Moonboy Society ecosystem NFT holders to work together and strengthen their bonds.

Travel Mechanics

In order to ensure the long-term sustainability of the Dimensional Nomads project, the mechanics of Universe Keys and multiverse travel will be designed to maintain a balance between the supply of Universe Keys and the demand for travel over a 10-year period.

Travel Cost

The cost of travel between universes will be determined by a dynamic pricing model, which takes into account factors such as the current supply of Universe Keys, the number of Dimensional Nomads in each universe, and the time since the last travel event. As more Dimensional Nomads travel to a particular universe, the cost of travel to that universe will increase, incentivizing users to explore less populated universes. To begin with, the cost of travel between universes could be set at a base rate of 10 Universe Keys. This base rate would be subject to change based on the factors mentioned above, ensuring that travel costs remain sustainable over the 10-year period. Travel Mechanics:

In order to travel between universes, Dimensional Nomad owners must visit a designated "Multiverse Portal" within the Dimensional Nomads platform. At the Multiverse Portal, users can select their destination universe and the Dimensional Nomad they wish to transfer. They will be informed of the travel cost based on the current dynamic pricing model. Users will need to submit the required number of Universe Keys for the travel. Upon submission, the portal's ancient technology will convert the Universe Keys into a powerful energy, enabling the Dimensional Nomad to be transported to the selected universe. A percentage of the Universe Keys used for travel (e.g., 25%) will be burned during

the process, contributing to the deflationary mechanism, and maintaining the balance between supply and demand. Periodic Supply Adjustment:

To ensure that there are sufficient Universe Keys available for multiverse travel over the 10-year period, periodic adjustments to the supply may be implemented. These adjustments could take the form of periodic "Multiverse Key Mints," where a limited number of new Universe Keys are introduced into the ecosystem based on specific milestones or events. Alternatively, the burn rate of Universe Keys could be adjusted to control the rate of deflation, ensuring that there is always a sufficient supply of keys to maintain the balance. Travel Incentives and Limitations:

To encourage users to travel between universes and maintain the balance across the multiverse, various incentives and limitations could be implemented. For example, users could be rewarded with bonus Universe Keys or other incentives for maintaining the balance between universes or for participating in special missions that require travel between universes. On the other hand, limitations such as cooldown periods could be implemented to prevent excessive travel and ensure that the supply of Universe Keys remains sustainable over the 10-year period. By designing the multiverse travel mechanics with these considerations in mind, the Dimensional Nomads project can achieve long-term sustainability while maintaining the delicate balance between the universes and the supply of Universe Keys.

Trait Protection

As Dimensional Nomads travel between universes, their unique traits may be subject to change. To protect their Nomad's traits, owners can use Universe Keys to safeguard specific traits during the transfer process.

When a user selects a Dimensional Nomad for transfer to another universe, they will be presented with the option to protect one or more of their Dimensional Nomad's traits using additional Universe Keys. The number of Universe Keys required for trait protection will depend on the rarity of the trait being protected.

For example, protecting a common trait may require one Universe Key, while protecting a rare trait may require ten or more Universe Keys (this was just illustrative, actual Universe Key cost will be substantially different than the example). The exact number of keys required for trait protection will be determined by a dynamic pricing model that takes into account the current rarity and demand for each trait.

Once the owner has selected the traits they wish to protect and the required number of Universe Keys has been submitted, the transfer process will begin. During the transfer process, the protected traits will remain unchanged, while the unprotected traits may be subject to change based on the rules of the destination universe.

If an owner fails to protect a desired trait during the transfer process, they can use additional Universe Keys to try again in subsequent transfers. However, as the project progresses and Universe Keys become scarcer, the cost of protecting traits may increase, making it more difficult and expensive to safeguard specific traits.

Overall, the trait protection mechanics are designed to add an additional layer of strategy and depth to the multiverse travel system. By allowing users to protect their Dimensional Nomad's unique traits,

while also managing the costs and risks associated with travel and trait protection, the Dimensional Nomads project can create a dynamic and engaging experience that encourages community participation and collaboration.

Tokenomics

The tokenomics of the Moonboy Society revolves around the deflationary nature of the Universe Keys and their various utilities within the ecosystem. By implementing a carefully designed tokenomic model, the project will encourage community participation, incentivize Moonboy Society ecosystem NFT holders, and maintain a healthy balance within the Multiverse.

1. **Deflationary Mechanism:** Universe Keys will be a deflationary token, with a decreasing supply over time. This will be achieved by burning a percentage of the Universe Keys used in transactions.
2. **Token Distribution:** The initial distribution of Universe Keys will be done through various means, including airdrops to early Moonboy Society holders, rewards for participating in community events, or as an incentive for staking Dimensional Nomad NFTs. This distribution model ensures that the community has access to the token and can actively participate in the ecosystem.
3. **Utility and Value:** The utility of Universe Keys within the Moonboy Society ecosystem is crucial in maintaining their value. Some of the key utilities will include:
 - Governance: Allowing Dimensional Nomad NFT holders to vote on some project decisions and proposals.
 - Access to exclusive content: Unlocking unique digital assets or experiences within the Multiverse.
 - Trading: Enabling the buying, selling, and trading of Universe Keys on third-party exchanges.
 - Gamification: Integrating Universe Keys into mini-games and interactive experiences.
 - Minting: Use for minting of future collections

	Percentage of Tokens	# of Tokens
Founders	12%	60,000,000
Artists	4%	20,000,000
Promotions, Marketing, Market Making	8%	40,000,000
Staking and Gameplay Rewards	65%	325,000,000
General Reserve	4%	20,000,000
Operations	7%	35,000,000
	100%	500,000,000

Cosmic Events

As the Dimensional Nomads journey through the vast multiverse, they have encountered a strange phenomenon - a cosmic event that holds the potential for great rewards or catastrophic consequences. The Nomads have heard whispers of a new universe waiting to be discovered, full of untold riches and adventure. But they have also heard rumors of a looming danger, a threat that could bring an end to their interdimensional travels. The fate of the Nomads and the multiverse itself hangs in the balance, and only time will tell which way the cosmic event will tip the scales. One thing is for certain, the multiverse is watching, and its response is impossible to predict. Will you join the Nomads in their journey and face the unknown?. We can't give it all away, but we can let you guess what the future holds for these Cosmic Events:

- Quantum Flux
- Cosmic Bounty
- Time Paradox

Side Missions

In addition to the main objectives of the Dimensional Nomads project, side missions will be introduced to provide added excitement and increase user engagement within the Multiverse. These missions will offer unique challenges and rewards, encouraging Dimensional Nomad NFT holders to collaborate and explore the Dimensional Nomads universe further.

1. **Multiverse Scavenger Hunt:** A scavenger hunt across the Multiverse, with clues hidden in different universes. Dimensional Nomad NFT holders will need to work together to solve the riddles and find the hidden treasures.

2. **Multiverse Exploration Challenges:** Timed exploration challenges, where Dimensional Nomad NFT holders must visit specific universes within a set time frame to earn rewards.
3. **Trait Mastery Challenges:** A series of challenges centered around specific Nomad NFT traits.

Gamified Promotion

To drive community engagement and create buzz around the Dimensional Nomads project, gamified promotions will be implemented that involve puzzles, riddles, and challenges. These promotions will be designed to encourage teamwork and collaboration among the community members.

1. **Riddle Challenges:** We will release a series of riddles related to the Dimensional Nomads project that require community members to work together to find the answers. Rewards will be distributed in the form of Universe Keys, special Dimensional Nomad NFT traits, or exclusive access to new content.
2. **Treasure Hunts:** We will organize treasure hunts within the Multiverse where Dimensional Nomad NFT holders must collaborate to find hidden Universe Keys or rare Dimensional Nomad NFTs. These hunts can be designed as a recurring event, creating anticipation and excitement within the community.
3. **Team-based Quests:** We will design quests that require Dimensional Nomad NFT holders to form teams and complete tasks within the Multiverse. These tasks can range from solving puzzles to battling against adversaries. Teams that successfully complete the quests will earn rewards such as Universe Keys, unique Dimensional Nomad NFT traits, or other exclusive content.

Phase 3: Beyond the Moon - Engage 2 Earn Web2 Game

Simple staking will remain with somewhat reduced rewards as compared to participating in our Engage 2 Earn game

As interdimensional travelers, the Moonboy Society recognizes the boundless possibilities that exist in the vast multiverse. Our journey has taken us to the far reaches of the cosmos, and we have seen wonders beyond our wildest imaginations. But we know that there is more to explore and discover beyond the moon.

Beyond the Moon, our upcoming engage to earn web2 game that will take you on an epic adventure through the multiverse. Dimensional Nomads and MBSociety will embark on a series of missions that will challenge your skills and reward your bravery.

Each of our 10,000 individually crafted elite Dimensional Nomad NFTs is equipped with unique traits and abilities that will prove invaluable in your quest. As you travel between universes, you will encounter other interdimensional travelers, explore new worlds, and face off against foes both great and small.

But the rewards for your efforts will be great. By completing missions, you will earn Chaos Gems and Universe Keys, which can be used to unlock special bonuses and benefits within the Moonboy Society ecosystem. And who knows, you may even stumble upon hidden treasures and artifacts that could change the course of history.

Beyond the Moon is not just a game, it is a journey through the multiverse. Are you ready to explore the unknown and discover what lies beyond the moon? Join us, and let the adventure begin.

Intro to Game Basics

- Obtain a Dimensional Nomad, MBSociety or Galaxy Commander Appointment NFT from the Moonboy Society collection
- Connect your wallet to the game's website
- Customize your account preferences
- Embark on missions beyond the moon and complete various tasks in our web2 non-custodial game to earn rewards
- Collect Chaos Gems and Universe Keys as you progress
- Use your rewards to upgrade your crew and rocket ships for even better mission success rates.

Game Play

Interdimensional Gateway

Home (the home screen of your account) will be equipped with an exchange center called the Interdimensional Gateway. Here, MBS members will be able to exchange resources on an open market, craft resources out of current supplies, or trade light diamonds for lit merchandise (only pay shipping). The Gateway will also house our exclusive giveaway wheel and raffle board.

Vaults

Vaults are found throughout the galaxy and are ready to be raided. You are a vault hunter within the MBS universe. You have also been given a vault of your own. Don't worry, your vault is safe at home. Make sure to return home to unload your stash. You'll be required to unload resources, loot, and other NFTs into your vault to make the final claim on your loot. i.e., Secure everything within your vault (transfer it to your account/wallet) by bringing your ships home often.

Earning

Mission Hours

XP Each mission undertaken by your explorers will accumulate "Mission Hours". These hours will be used as experience points to track their progress in the MBS universe. Mission hours are tied to each

asset and can be searched on the MBS website. For every 1,000 hours accumulated, your asset will gain a +1 Power and +1 Toughness bonus, making them stronger and more valuable as you engage in the game. With hard work, even your suits could become more powerful than the legendary Moon Dock Saints.

Chaos Resources

In the vast expanse of the MBS universe, resources are scarce and coveted by all astronaut explorers. Among them, the Chaos Resources stand out, powerful substances that can turn the tide of battle and upgrade your ship to new heights. Here are the six types of Chaos Resources that you need to master to become a true Galaxy Commander:

Moon Juice - This is the lifeblood of our Web 2 economy, and the fuel that powers your ship. It's coveted across the galaxy and only the bravest and most cunning astronauts can acquire it. With its magical properties, Moon Juice can be converted into rare and powerful substances, making it an essential resource for any space explorer.

Plasma Gold - This rare and valuable substance is used to craft the most powerful weapons and cannons across space. With Plasma Gold, you can upgrade your ship's offensive capabilities and become a formidable opponent in PVP battles.

Star Dust - The universe is full of mysteries, and Star Dust is one of them. This ethereal substance is said to hold the key to faster-than-light travel and is essential for upgrading your ship's speed. With Star Dust on board, you can reduce the length of each mission and explore further into the unknown.

Deku Emeralds - If you want to become a juggernaut in space, you need to collect the Deku Emeralds. These tough and resilient gems have been used for centuries in armor manufacturing, and they can increase your ship's defensive capabilities to new heights.

Rocket Fuel - Every space mission needs fuel, and Rocket Fuel is the most important resource in the MBS Universe. You can find it in abundance in the Juice and Blood galaxies, and it's essential for longer and more complex missions.

Dark Diamonds - The ranger class hoards these precious gems for good reason. They increase your luck and give you a higher chance of finding rare loot during your missions. With Dark Diamonds on board, you'll become the best treasure hunter in the galaxy.

Light Diamonds - These "Moon Boy" blue diamonds are the most valuable resource in the universe. They can be used for trade, purchasing IRL merch, spinning the giveaway wheel, and participating in some of the most incredible raffles in CNFT history. With Light Diamonds, you can upgrade your ship's stealth and gain the first-strike advantage in PVP and PVE encounters.

Universe Keys

Universe keys will be included in the rewards for mission completion.

Quantum Cruiser NFTs

Quantum Cruiser NFTs are upgradeable vehicles that Moonboys strap into for interdimensional missions. As you venture into the multiverse of the Moonboy society, you will encounter challenges and

foes that demand cutting-edge technology and weaponry to overcome. This is where your Quantum Cruiser upgrades come into play. Upgrades such as advanced engines, reinforced shielding, and devastating armaments will be crucial to survive the perils of interdimensional travel.

Upgrades will be available for purchase at the Interdimensional Gateway or can be found as loot in the Polygon, Ethereum, Cardano, and Solana Universes. Each upgrade will require a specific combination of chaos resources, so it will be essential to collect all seven types of resources to unlock the full potential of your capsule.

Some upgrades will focus on enhancing the speed of your vehicle, enabling you to travel greater distances and traverse between universes quicker. Others will concentrate on increasing the capacity of your cargo hold, allowing you to transport more resources and loot back to the Interdimensional Gateway. And, of course, there will be upgrades that improve the attack and defense capabilities of your capsule, making you a formidable adversary in both PVP and PVE battles.

But be warned, acquiring vehicle upgrades will not be easy. You will need to explore the farthest reaches of the multiverse, battle formidable adversaries, and outsmart other explorers to acquire the most powerful upgrades. Only the bravest and most shrewd astronauts will be able to equip their vehicles with the finest upgrades and claim the title of interdimensional champion.

Capacity

Varying cruiser capacities will be available for individual, pairs, squads, and crews. For example, smaller personal ships will buckle up 1-3 astronauts while MBS community ships will manage up to a couple dozen NFTs from dozens of wallets.

There are fuel requirements for each mission depending on the length and severity. Each ship will need to be refueled with an in-game resource called "Rocket Fuel". Rocket fuel will be lootable, farmable, and is one of two "craftable" chaos resources (forged with Moon Juice). Rocket fuel will be carried in your "Fuel Tank". Fuel Tanks can be upgraded using the Rocket Fuel chaos resource. This will enable longer, more efficient moon missions as you travel around the galaxies.

Each ship will also be equipped with a cargo capacity. Cargo capacity determines how many resources your ship can carry. Be sensitive to your limits. Make sure to head back to the Interdimensional Gateway often for the stashing, crafting, and exchanging of all that loot. Cargo capacity can also be upgraded.

*Carrying more resources on board at the beginning of your trip will increase your luck during the duration of your mission.

Quantum Cruiser Stats

The Quantum Cruiser's performance is crucial to achieving intergalactic dominance. Your ship's stats are determined by the sum of the astronauts on board and the bonuses provided by the ship's upgrades. These upgrades include armor and weapons that can be improved using chaos resources to increase the ship's attack and defense capabilities.

You can stack your Quantum Cruiser in various ways based on your strategy. Will you prioritize weapons for a more aggressive approach? Or will you focus on armor for a more defensive strategy? The choice is yours, but choose wisely as you navigate the treacherous depths of the Moonboy Society. Only the bravest and most skilled astronauts will emerge as victorious leaders.

Quantum Cruiser Upgrades

As you traverse the vastness of the multiverse in your Quantum Cruiser, you'll encounter challenges and foes that demand the most advanced technology and weaponry to overcome. This is where ship upgrades come into play. Upgrades such as enhanced engines, reinforced armor, and devastating weapons will be critical to your survival in the chaos of the cosmos.

In phase 3, the Moonboy Society will unveil "Quantum Cruiser Upgrades" - NFTs that can boost your ship's speed, capacity, and overall strength. These upgrades will be available for purchase at the Interdimensional Gateway or can be discovered as loot in the multiverse. Each upgrade will require a specific combination of chaos resources, so it will be crucial to collect all seven types of resources to unlock your Quantum Cruiser's full potential.

Some upgrades will focus on improving your ship's speed, enabling you to travel further and faster through the multiverse. Others will expand your cargo hold capacity, allowing you to carry more resources and loot back to the Interdimensional Gateway. And of course, there will be upgrades that improve the attack and defense capabilities of your Quantum Cruiser, making you a powerful ally or fearsome opponent in both PVP and PVE battles.

But obtaining Quantum Cruiser Upgrades will not be a simple feat. You will need to explore the far reaches of the multiverse, work with other explorers to obtain the most powerful upgrades and battle formidable adversaries to survive the unknown. Only the most daring and astute astronauts will be able to equip their Quantum Cruisers with the best upgrades.

So prepare your Quantum Cruiser, stock up on rocket fuel and chaos resources, and embark on a journey to conquer the multiverse. The future of interstellar exploration is here, and it's yours for the taking.

Jobs

Attackers

In the MBS universe, battles are inevitable. That's why you need Attackers, NFTs equipped with powerful weapons and items to help your crew in skirmishes. These items boast high power, making them essential for PVP and community battles.

- Photon Blasters
- Plasma Cannons
- Laser Swords
- Quantum Torpedoes
- Black Hole Projectors
- Gravity Disruptors
- Energy Drainers
- Dark Matter Weapons
- Neutron Blasters

- Ion Disruptors

Defenders

As you explore the universe, you'll encounter dangers and enemies that seek to destroy your Quantum Cruiser. That's where Defenders come in. Equipped with items that provide high toughness, Defenders will help protect your ship against attackers and keep you safe as you journey through space. Defenders will be crucial for those with a farming strategy.

- Force Fields
- Energy Shields
- Armor Plating
- Shield Generators
- Nanobots
- Repair Drones
- EMP Jammers
- Cloaking Devices
- Anti-Gravity Fields
- Dimensional Anchors

Utility Assets

Some NFTs in the MBS universe are not designed for battle, but they are still valuable assets to have on board your Quantum Cruiser. These are the Utility Assets, which provide added bonuses to your crew's overall stats. For example, backpacks increase the cargo capacity of resources your ship can carry back to the Interdimensional Gateway, while other traits improve speed, luck, and even stealth.

- Cargo Backpacks
- Scanners
- Mining Drones
- Repair Kits
- Navigation Systems
- Communications Arrays
- Tractor Beams
- Fuel Converters
- Life Support Systems

- Energy Cells

Galaxies

Missions take place in one of three separate galaxies, each with its own unique features and challenges.

Juice Galaxy

The Juice Galaxy is the largest of the three and offers countless planets to colonize and resources to farm. It's the perfect place for long-term investors and hodlers of Cardano NFTs to establish themselves and generate resources.

Blood Galaxy

The Blood Galaxy is where the constant battle for power and fuel takes place. Here, explorers must stack Rocket Fuel to increase their chances of success in the high-risk, high-reward environment. PVP battles, community raids, and rocket fuel farming are all part of the game in this galaxy.

Sayan Galaxy

Finally, the Sayan Galaxy is the ancient galaxy that has seen countless stars and eons of time. It's home to hidden treasures in the form of NFTs, resource chests, and even MBS merchandise vouchers. Here, explorers can mine for ship upgrades to improve their rocket's speed, capacity, and overall strength.

Each galaxy presents its own unique challenges and opportunities for explorers to earn and improve their assets. It's up to the players to navigate these galaxies and emerge as the most successful explorers in the MBS universe.
